USDA IMPLEMENTS NEW CROP DISASTER ASSISTANCE PROGRAM

Producers May Begin Applying for SURE Program at FSA County Offices on Jan. 4, 2010

Indianapolis, December 29, 2009 – Julia A. Wickard, Executive Director of USDA’s Farm Service Agency in Indiana announced that USDA has implemented the new Supplemental Revenue Assistance Payments program (SURE) in accordance with the 2008 Farm Bill. Wickard also encouraged producers to visit their USDA Farm Service Agency (FSA) county office beginning on January 4, 2010, to participate in the program if they suffered crop production losses during the 2008 crop year.

“The SURE assistance program will address those crops in Indiana that were associated with the historic flooding that occurred in 2008. In Indiana, every county potentially has farms that could be eligible due to the Secretarial-declared disaster areas that were issued in 2008,” said Wickard.

“This program is a complement to the other suite of FSA programs that are available to farmers across the nation,” she said. “Providing financial assistance to farmers who provide food, fiber and fuel to our country, and who were negatively impacted due to issues beyond their control is important. These payments will begin in January 2010, just in time to help with planning for the next year’s crop.”

SURE provides crop disaster assistance payments to eligible producers on farms that have incurred crop production or crop quality losses. The program takes into consideration crop losses on all crops grown by a producer nationwide. SURE provides assistance in an amount equal to 60 percent of the difference between the SURE farm guarantee and total farm revenue. The farm guarantee is based on the amount of crop insurance and Non-insured Crop Disaster Assistance Program (NAP) coverage on the farm. Total farm revenue takes into account the actual value of production on the farm as well as insurance indemnities and certain farm program payments.

-more-

To be eligible for SURE, producers must have suffered at least a 10 percent production loss on a crop of economic significance. In addition, producers must meet the risk management purchase requirement by either obtaining a policy or plan of insurance, under the Federal Crop Insurance Act or NAP coverage, for all economically significant crops. For 2008 crops, producers had the opportunity to obtain a waiver of the risk management purchase requirement through a buy-in provision. Producers considered socially disadvantaged, a beginning farmer or rancher, or a limited resource farmer may be eligible for SURE without a policy or plan of insurance or NAP coverage.

In addition to meeting the risk management purchase requirement, a producer must have a farming interest physically located in a county that was declared a primary disaster county or contiguous county by the Agriculture Secretary under a Secretarial Disaster Designation. Regardless of a Secretarial Disaster Designation, individual producers may also be eligible for SURE if the actual production on the farm is less than 50 percent of the normal production on the farm due to a natural disaster. For SURE, a farm is defined as all crops in which a producer had an interest nationwide.

For more information on the new SURE program, please visit your local FSA county office or <http://www.fsa.usda.gov>.
