

February 14, 2010

Dear Fellow Agriculture Supporter:

In the past few years the Carroll FFA has participated in the State and National FFA Agri-science Fair. We would like to continue this participation.

As you know the field of agriculture is growing by leaps and bounds every day and this change is mainly due to research and vision. We at Carroll feel a deep need to be a part of that evolution. It is our desire to partner with agribusinesses and individuals within our area to work on research projects.

The objectives we hope to achieve are:

1. Fresh innovative ideas with real world applications
2. Access to equipment needed to conduct the research, instruction on operation or
3. Contact information for equipment
4. Ability to extrapolate “real” data and apply its meaning
5. Real scientific experiences, with real results.

In the next few days a FFA member or advisor will be contacting you to speak about forming a partnership with a student or a team of 2 students to help them with a research project. There will be no money involved. Just an old fashion exchange of ideas and a peek at what the real world is looking for. Please contact Mrs. Keown at mkeown@carroll.k12.in.us or Mr. Keown@carroll.k12.in.us with questions or information. We look forward to hearing to hearing from you.

As always, we thank you for past support and your continued support.

Sincerely,

Jill Griffin, President
Carroll FFA Chapter

Melissa Keown
Advisor, Agri-Science
